

Chen Fuel Systems LTD

Fuel pump Model –FSU-50

Description

Model FSU- 50 combination pump applies to form a complete set. This pump contains suction and air separation functions together. It also apply for transporting other liquids that may contain air. It can separate air from gasoline, coal oil, diesel oil, oils etc. It has the following features: advanced design, compact structure, low noise, long service life, aluminum alloy shell, and perfect finish.

Technical performance

Installation dimensions	204mmx208mmx313mm
Nominal Speed	660rpm
Nominal Flow rate	50L/min
Dry degree of vacuum	≥0.054MPa
Output pressure	0.18MPa- 0.20MPa
Max. Noise	68 db(A)
Separation ability	Oil and air >20%
Motor power	750 watt
