## Flow Meter Model FMU-90

### Description

Model FMU-90 flow meter adopts advanced technology, which is widely used on CFS diesel and gasoline dispensers. This product has multiple advantages like:

- Long operation life
- High precision
- Sturdy structure etc.

It is the best choice for diesel and gasoline dispensers.

### Technical performance

Discharge rate per revolution:	0.5L
Rotary direction of shaft :	CW
Main Dimensions:	224mm x197mm
Flow range:	9L to 90LPM
Working pressure:	0.12MPa-0.25MPa
Accuracy:	±0.2%(5L/min-50L/min)
Repeatability:	≤0.1%
Working life (at normal conditions):	≥ 2.000.000 Liters
